## FEATURES

1. The FS-series is a floating scum skimmer which is designed for the collection of foam scum on water surface, through by suction mouth to collect scum efficiently in order to reduce the manpower work.
2. By this floating type function, the suction part can keep its relative position with the water surface, which prevents operation failure due to changes in the water level.
3. Can be adjusted to any depth below the water surface by floater.

1. Product supported by continuously research and improvement. We reserve the right to modify the specifications, capabilities and accessories of all products.
2. Please inform the detailed type, application, phase, power, caliber, voltage and head before order. It is easy to obtain a suitable model.
3. All the capabilities and specifications are subject to the products. If the voltage and frequency is specific standard, please customize in advance.
